

# Year 5 Homework

Friday 6<sup>th</sup> June 2014

We have had a really great week! We have been learning about information texts in English and are planning our own information leaflets about a space restaurant. We have been looking at probability and ratio in Maths this week. We've also made family trees in Forest School.

Here is your homework for the weekend. It needs to be completed in your homework books and handed in by **Wednesday 11<sup>th</sup> June**.

## Maths

This week we have been learning about probability. Your homework is to find the probabilities of events. Complete this in your Maths homework book.

## English

We have been looking at the features of information texts this week. A generaliser generalises about a statement.

For example:

**Most** people love chocolate.

In your English homework books, write **6 sentences minimum** using generalisers.

Here are some generalisers to help you:

Most

Some

Many

The majority

Always

## Forest School

We will have Forest School on Monday. **Could you all bring in wellies and your Forest School kit as it may be muddy.**

Have a lovely weekend!

The Year 5 Team
